F-11

NIGHT PINE
#0F1F17
Deep cabinetry, trim, exterior-inspired accents.

F-12

FOREST BLACK
#08130E
Graphic contrast, signage, ultra-dark details.

A Simple Guide to Using Green Tones in Design

- **Lighter greens-** These shades help to open up a space.
- **Mid greens-** These colors generate warmth.
- **Deep greens-** These hues serve as architectural anchors.

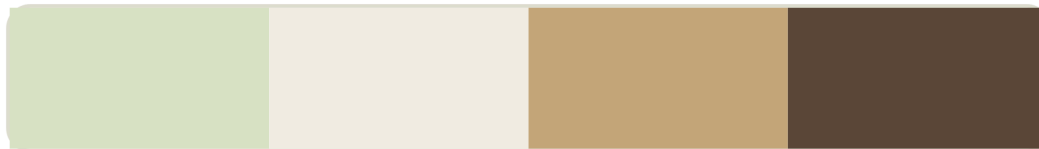

To enhance these greens, consider pairing them with natural wood, warm whites, stone, black accents, or aged brass for a cohesive look.

Easy room pairings

These are starting combinations rather than strict rules. The same shade of green can change significantly with different lighting conditions, such as daylight or warm bulbs, as well as the color of the flooring.

Soft + Natural

Ideal for living rooms, bedrooms, and serene home offices.

warm ivory

+ light oak +

soft brown

dark brown

Deep + Moody

Deep and moody atmospheres are most effective in spaces where you want to create a sense of intention and grounding.

green

walnut

linen beige

black

Before painting the whole room: sample the physical paint on the actual wall. Check it in morning light, afternoon light, and at night. Digital HEX values help you plan - the real wall decides the final color.

HPT COLOR GUIDE

From screen color to real paint

Use this page to save the shades you like, note real paint matches, and compare how they look in your home.

1

Pick a shade

- Save any HEX color or palette shade that catches your eye.
-

2

Find a paint match

- Add the store, brand, color name, or number when you find one.
-

3

Try it at home

Sample it on the wall or bring home a physical paint chip.

4

Write what you notice

Morning light, nighttime, flooring, furniture — jot down whatever changes your mind.

Colors I’m Considering

Hex Code	Color Name	Description
#EEF1E7	PALE FOREST	Soft backgrounds, trim-adjacent walls, airy spaces.

Color note: Digital screens, printed pages, lighting, sheen, flooring, trim, and surrounding finishes can all change how a color looks. Use this guide to narrow your favorites, then confirm the actual paint color with a physical sample in the room before making the final choice.
